### Guiding Principles and Protocol

### School Trips: Organisation and Travel Protocol

- **Definition:**

Education brings holistic and wholesome growth in an individual. To achieve this aim, it is imperative that the institute provide enough help and support to the student to understand what is happening around him and sensitize him in this regard.

- **Statement of Position**

The school acknowledges that students can derive immense educational benefit by taking part in off-site visits. Taking part in problem solving, decision-making and residential experiences both at home and abroad can enhance the development of personal and social skills. The knowledge and experience gained beyond the classroom can consolidate and extend the curriculum taught within it. This policy seeks to establish a framework from which students can benefit in a safe, healthy and secure environment.

The school policy recognizes that every student should have full access to each visit that is appropriate to their class, year or subject, regardless of their abilities, thus enabling an all-round development of the child

- **Objectives**

An off-site visit is defined as pupils going 'beyond the school gates' to pursue an activity organized through the school. Activities may take place during or after the school day, at weekends or during school holidays and will be educational, curricular or recreational based. All off-site visits must have an educational purpose and pre-determined clear objectives. All participants in activities will be identified as group members associated with the school.
